

Submersible drainage pump with cooling jacket for clean and drainage water.

Bully C140, C150

Application

Irrigation and drainage assignments in clean or dirty water. Cellar draining, keeping trenches, shafts and rooms dry. Domestic wastewater disposal in cellar rooms (e.g. washbasins, showers, washing machines). Reduction of surface water. Emergency deployment for flooding. Water extraction from water-courses or reservoirs for irrigation.

10 m connecting cable enables an actual submersion depth of 7 m.

Partially submersible motor for optimum cooling even with surface motors. Automatic ventilation with additional air vent screw. Removable strainer allows extraction of residual water down to 5 mm.

Automatic purging device can be implemented

DIN EN 12050-2: Design tested and monitored.

Installation: Stationary or mobile. Version with lever float switch for use as automatic water level controlled drainage pump. Continuous operation by means of float switch lock possible.

Pumped medium: Clean- or drainage and grey water containing solids up to 20 mm particle size (C150). Max. temperature of pumped medium: 35°C, for brief periods up to 60°C.

Operating mode: Continuous operation.

Design

Submersible pump, consisting of: Pump: Single-stage stainless steel centrifugal pump with cooling jacket and discharge at the bottom.

Impeller: Open multi-blade impeller, free passage C140: 10 mm,

C150: 20 mm

Motor: Single-phase electric motor. Motor protection through temperature monitoring. Insulation class F. Protection rating IP 68. Stainless steel motor shaft with ceramic coated sealing surface, permanently lubricated roller bearings. Shaft seal: 3 shaft sealing rings.
